PROFESSIONAL SUMMARY

Full-stack web developer with a foundation in React, Laravel, and Inertia.js. Replaced a paper-based approval process for 30+ government office staff with a production system I helped ship during my OJT, earning a 98/100 performance rating. Independently designed and built a full-stack gym management platform (PHP, MySQL, AJAX) from database schema to dashboard, including POS, booking, and analytics modules. Looking to bring that same ownership to a junior developer role, with a long-term goal of moving into AI systems development.

TECHNICAL SKILLS

- **Frontend:** React, Inertia.js, Tailwind CSS, JavaScript, HTML5, CSS3, responsive/mobile-first design
- **Backend:** PHP, Laravel, RESTful patterns, MySQL, MySQL schema design, schema-driven data mapping
- **Tools & Practices:** Git/GitHub (branching, pull requests, collaborative version control workflows)
- Problem-solving, adaptability, cross-functional teamwork, clear technical communication

EXPERIENCE

Software Developer Intern (OJT)

Feb 2 – Mar 31, 2026

DepEd Schools Division Office of San Jose City — ICT Department

- Built the frontend for a CS Form No. 6 digitalization system (React 19, Inertia.js, Tailwind CSS v4, Laravel 12), replacing a paper-based approval process for 30+ DepEd personnel with a three-level RBAC workflow (Standard User, Approver, Admin), interactive PDF generation/parsing (FPDF, FPDF, PDF.js), and digital signature capture
- Wrote feature and unit tests with Pest PHP and Model Factories (AAA pattern), and deployed and maintained the application on a live production server, coordinating with a backend-focused teammate
- Logged 342 hours (300-hour requirement) and earned a 98/100 (Excellent) rating across all four quarterly performance appraisals

FEATURED PROJECTS

Gym Management System — Thesis Project (Defended)

- Built a full gym management platform for Boiyet's Fitness Gym (PHP, MySQL, AJAX) with role-based portals for Admin, Trainer, and Client, a custom-designed database schema, and a full POS/inventory module with low-stock alerts and printable receipts.
- Implemented QR code attendance with real-time audio/visual feedback and duplicate-scan protection, session booking, trainer-built workout/nutrition plans, revenue analytics with PDF export, audit logs, and one-click database backup.

CS Form No. 6 Digitalization System — DepEd OJT

- Structured the frontend around reusable, domain-grouped React components and a thin-controller/Service-Action backend pattern, built deliberately to scale toward a future HRIS without a rewrite.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

- STI College San Jose | GWA: 1.79 | Presidential List (2022)

CERTIFICATIONS

- DepEd SIPP OJT Certificate of Completion (Feb 2 – Mar 31, 2026)
- Cisco Networking Academy — Introduction to Cybersecurity (September 2025)
- Oracle Academy — Java Fundamentals, Terms 1 & 2 (2023)

AWARDS

- ThinkQuest Champion, Tagisan ng Talino — School Level, STI College San Jose (March 2025)
- ThinkQuest 3rd Place, Tagisan ng Talino — School Level, STI College San Jose (March 2024)
